Fall 2003
Student Comments**

If I could make a few suggestions it would be to hire more teachers rather than employ so many local area high school teachers and part timers, and also offer more of the classes mentioned in the course catalog. One other thing get some more geography teachers, Mr. Cope need help and it would be great if there were more religion/theology type classes offered.

I am a freshman who couldn't get in housing and that was a serious inconvenience. You guys should really do something about that.

I think this is a great school and its only getting better.

Keep on improving it!

I am in art major & I find the art program to be very limited. But it's okay, I'm leaving anyway... just a comment. (No offense)

More evening classes should be made available. I feel more consideration should be made to all students when assigning workshops and events as a requirement for the professor's class. Some of your students are working full-time and have families.

CSU Rocks!

There is no nightlife here!

On a scale to 10, I would give CSU an 8.3.
