

**ACT Entering Student Survey  
Columbus State University  
Fall 2005  
Student Comments**

**SECTION V - COMMENTS AND SUGGESTIONS:**

- Do not give out surveys. I have taken surveys like this for the past 5 years.
- This form should have to be taken by only entering freshmen. If someone has already attended the college, they should be excluded from this form.
- I think CSU needs to provide or build more living quarters.
- I would like to see an Air Force ROTC program (more selections).
- I first want to say that I think that CSU is a wonderful school & I am glad I have the opportunity to attend here. However, my registration process was a bit stressful.
- I am satisfied so far with how everything has been going.
- I am really enjoying CSU!
- I hope the Fine Arts Program continues to grow and become the best Fine Arts Program in the south, because I believe it can be by the faculty and the talented students.
- Freshmen should not have to walk to their classes – it takes 15 minutes there and 15 minutes back.
- Keep offices open later for those students who attend at night and work during the day. Also, have more classes that cater to re-entry students who have been out of high school for more than five years to allow time to re-fresh or learn something new.
- Please make it more clear on ½ classes that you should be able to drop them without having a “W” on your record.
- Need to make more accommodating to non-traditional students, especially those who are employed full-time.
- I have a suggestion; I think the school should get a football team. More people would want to go here and the school will be advertised better. I really think you should consider it. It might cost a lot of money at first, but I’m sure it will bring even more money in.
- I think the lab materials should be updated.
- Paint the outside of the old dorms in Courtyard I. This is a great University with a great staff. Keep it up!
- My Foreign Language class teacher is not that professional. He hands out assignments hand-written and photo-copied. I had high school teachers that were much more professional than him.
- Financial Aid being based on you and your parents income. That should change because a lot of parents are not paying for their students to go to school. That forces students to go in debt because they can’t afford the tuition that keeps going up.
- This college is small, but it’s on its way to becoming more noticeable to the state of Georgia. I have enjoyed my time here so far. I hope that this experience continues until I leave.
- This school should have a glee club for non-music majors who still enjoy music.
- This school should add a dental program.

- In the future, the people who conduct these essays should maybe consider informing us what the purpose for taking the survey is. Then maybe people would answer the questions more truthfully and feel comfortable about taking the survey.
- The financial aid assistance needs to be entirely better. I'm still having problems with my financial aid.
- My financial aid office counselor was very rude the first time I met her. She had an attitude. I think enrollment services could do a better job. It does not seem that well organized. Getting a transcript takes too long.
- CSU needs more sports – like football.
- I wish I could have taken more classes, but they were all full. I like it here at CSU and look forward to my year as a freshman. The dorms are great, but I think we need stricter policies for quiet times. We also need better maintenance. I also think we should be given times for gym and cafeteria openings and closings – not only those – but other places as well. Thank you so much!
- I appreciate the speed in which the Higher One account allows me to receive my refund and loan disbursements. I do not like the fact that I am charged fees for using my card or to transfer my funds to an account of my choosing.
- There are not enough announcements about workshops for choosing majors.
- Use real pencils! My hand is cramping.
- No small pencils!
